12. Outpatient Care
13. Pain and Pruritis
14. Prevention/Epidemiology/Public Health
15. Psychological and Psychosocial
16. Quality Improvement
17. Reconstruction
18. Rehabilitation
19. Research
20. Surgical Care (acute, non-reconstructive)
21. Translational Sciences: Critical Care and Metabolism
22. Translational Sciences: Wounds and Scars

## Category Descriptions:

### **Advocacy/Government**

*Your abstract involves any aspect of raising funds for burn care or burn research.*

### **Aftercare and Reintegration**

*Your abstract involves any aspect of the medical care, mental healthcare, or re-entry into school, the workplace, and society for burn survivors.*

### **Clinical Sciences: Critical Care**

*Your abstract involves any aspect of medical or critical care of humans with burns or other conditions treated by burn care providers.*

### **Clinical Sciences: Wounds and Scars**

*Your abstract pertains to any aspect of wounding or scars involving humans with burns or other conditions treated by burn care providers.*

### **Clinical Sciences: Nutrition and Metabolism**

*Your abstract pertains to any aspect of nutrition and/or metabolism in humans with burn injuries or other conditions treated by burn care providers.*

### **Disaster/Mass Casualty**

*Your abstract involves any aspect of preparation for and/or provision of burn care in a situation of multiple burn injuries, or other mass events that affect the ability to deliver burn care.*

### **Ethics**

*Your abstract describes any aspect of bioethics related to the care of the burn patient.*

**Firefighter Issues**

*Your abstract describes any topics of relevance to firefighters or other first responders to fire scenes.*

**Fiscal and Leadership**

*Your abstract describes any aspect of financial or leadership issues related to the operation of a burn care program.*

**Medical Care (Non-Critical)**

*Your abstract describes any aspect of medical care of a burn patient that would not be considered critical care.*

**Nursing**

*Your abstract involves any aspect of nursing care provided to humans with burn injuries or other conditions treated by burn care providers.*

**Outpatient Care**

*Your abstract pertains to any aspect of care for human patients managed in a burn outpatient program.*

**Pain and Pruritis**

*Your abstract pertains to any aspect of pain or itching (pruritis) in humans related to burn injuries or other conditions treated by burn care providers.*

**Public Health/Prevention/Epidemiology**

*Your abstract pertains to the prevention, or epidemiology, or public health implications of burn injuries other conditions that are managed by burn care providers.*

**Psychological and Psychosocial**

*Your abstract pertains to any psychological conditions or psychosocial implications of human patients with burn injuries or other conditions treated by burn care providers.*

**Quality Improvement**

*Your abstract pertains to any formal (or dedicated) process of improving the quality of care provided to humans with burn injuries or other conditions treated by burn care providers.*

**Reconstruction**

*Your abstract pertains to any aspect of surgical reconstruction of humans with injuries or conditions that are treated by burn care providers.*

**Rehabilitation**

*Your abstract pertains to the rehabilitation therapy of humans with burn injuries or other conditions that are treated by burn care providers.*

**Research**

*Your abstract describes issues pertaining to research methodology in burn care.*

**Surgical Care (Non-Reconstructive)**

*Your abstract pertains to any aspect of acute burn or complex wound surgery that is not considered to be later phase reconstructive surgery.*

**Translational Sciences: Critical Care and Metabolism**

*Your abstract describes bench/laboratory research (e.g. animal, in vivo, in vitro) on any aspect of critical care or metabolism involving burn injuries or conditions that receive treatment by burn care providers*

**Translational Sciences: Wounds and Scars**

*Your abstract describes bench/laboratory research (e.g. animal, in vivo, in vitro) on any aspect of wounding or scarring involving burn injuries or conditions that receive treatment by burn care providers.*
