

2020 Call for Data Submission Announcement

Open for Submissions: Monday, August 17, 2020

Deadline: Monday, October 5, 2020

NEW this year: Submit encrypted files directly to ABACallForData@bdatainc.com.

The American Burn Association (ABA) announces its annual Call for Data Submission. The de-identified data are used to create the annual summary report chart pack, aggregate and benchmark reports on the new [Burn Care Quality Platform](#), and the [National Burn Repository Research Dataset](#). These products are valuable resources for clinical quality improvement and research within the burn care community, and they are only possible with your participation.

DATE RANGE: Included in this call are data for all burn care cases treated at your burn facility with admission dates from **July 1, 2019** through **June 30, 2020**.

Data submitted should adhere to the 2015 National Burn Data Standard (data dictionary) and ABA file format specifications.

SUBMISSION PROCESS: All inpatient burn facilities are invited to submit data. Submissions will be accepted through the ABA's technology and analytics partner, BData.

FEES: Your annual **Burn Care Quality (BCQ) Analytics** registry participation fee includes:

- Call for data submission, processing and analysis,
- Development of the annual summary report,
- Access to the **BCQ Platform** to view interactive benchmark reports (**NEW!** this year).

BCQ Analytics invoices were sent in June 2020. If your center did not receive your invoice and platform enrollment packet, please contact us at BCQP@ameriburn.org. A signed license agreement (included in the enrollment packet) is required to obtain access to online benchmark reports.
