

*Are you an investigator interested in conducting multicenter, clinical research related to the care of trauma patients?*

*Are you a leader in a professional organization interested in supporting trauma research?*

The **Coalition for National Trauma Research** was established in 2014 by the American Association for the Surgery of Trauma, American College of Surgeons Committee on Trauma, Eastern Association for the Surgery of Trauma, Western Trauma Association and National Trauma Institute. Recently, the American Burn Association, Orthopedic Trauma Association, Society of Trauma Nurses, Military Health System Strategic Partnership of the ACS, and American Trauma Society have joined as well.

The **Mission of CNTR** is to enhance trauma research in the U.S. by:

- **Advocating** for sustainable research funding commensurate with the burden of disease,
- **Coordinating** research efforts across professional organizations that span the continuum of injury care and
- **Strengthening** the infrastructure for multicenter investigation.

To find out how the Coalition for National Trauma Research (CNTR) can expand your research capabilities, join us for this informational webinar

### **“What is CNTR?”**

**Presented by Dr. Eileen Bulger, Chair of the Board of Directors**

Thursday, November 5<sup>th</sup> 4:30-5:30 p.m. CST.

**Please join my meeting from your computer, tablet or smartphone.**

<https://global.gotomeeting.com/join/689469573>

**You can also dial in using your phone.**

United States: [+1 \(646\) 749-3122](tel:+16467493122) Access Code: **689-469-573**

*To receive an invitation to attend the webinar so it automatically populates your calendar, email [Ana@NatTrauma.org](mailto:Ana@NatTrauma.org) and simply put “What is CNTR Webinar” in the subject line.*
